DETAILED ACTION

Claims 1-11 are pending in this application.

Priority

This application is a 371 of PCT/JP03/02632, filed on 6 March 2003.
Acknowledgement is made of Applicant's claim for Japan Patent Application 1542/02 under 35 U.S.C. § 119(a-d), filed on 7 March 2002.

Response to Lack of Unity

The response to the restriction request with election of Group I and species of compound IV-34 described at page 51 of the specification *without traverse* by Applicants' representative, Bruce E. Kramer dated on 23 March 2006, has been considered.

In accordance with M.P.EP 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims with process claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until, such time, a restriction between product claims and process claims is deemed proper. Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution to maintain either dependency on the product claims or

Art Unit: 1626

to otherwise include the limitations of the product claims. ***Failure to do so may result in a loss of the right to rejoinder.***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The election of **Group I**, directed to products of formula (I),

and the specific compound IV-34,

, depicted on page 51 of the specification, is

acknowledged.

Status of the Claims

Claims 1-11 are pending in this application. Claims 1-2 (in part), 3-4, 7-9 and 11 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention as the direct result of election of Group I without

Art Unit: 1626

traverse. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and will require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

The scope of the invention of the elected subject matter is as follows:

Compounds of more specific formula according to Group I of the election,

R^1 - R^6 and R^{10} - R^{11} each represent H or C_1 - C_6 alkyl... as defined in claim 1;

m , n , and r each represent 0, 1, 2, or 3;

Y^1 and Y^2 each represent the group as defined in claim 1.

Therefore, claims 1-2 (in part), 5-6, and 10 are ready for examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "may be substituted" for Y^1 and Y^2 in claim 1-10 is a term which renders the claim indefinite. The term " may be substituted " is not

Art Unit: 1626

defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "...Z is a single bond (i.e. the case that m and n are 0 in the formula (1))" is inconsistent among Z, m and n. Formula (1) is about X not Z. Therefore, Examiner interprets Z as X as a single bond in view of m and n for examining purpose of claim 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102 (b) as being anticipated by Schwab *et al.*, WO 95/24397 (1995).

Applicants instant elected invention in claims 1 and 2 teaches compounds of

formula I,

(I)

, depicted in claim 1, wherein:

Art Unit: 1626

R^1 - R^6 and R^{10} - R^{11} each represent H or C_1 - C_6 alkyl... as defined in claim 1;

m , n , and r each represent 0, 1, 2, or 3;

Y^1 is a lower alkyl, a phenyl group may be substituted,... as defined in claim 1;

Y^2 is a lower alkenyl group may be substituted, ... as defined in claim 1.

Schwab *et al.* teach specific compound of Example 53

on page 55 of WO 95/24397, read on the instant claims 1-2 wherein:

R^1 - R^2 , and R^3 - R^4 is H,

m is 0;

n is 0;

r is 0;

Art Unit: 1626

Y¹ is a substituted phenyl;

Y² is alkenyl.

Conclusion

No claims are allowed.
